Dear Ernst:

I have your letter of July 4 and want to thank you for your good wishes and congratulations.

At present I am not doing any teaching in New York--only in New Haven, and that is over until next fall. I go to New York for meetings of the New York Society and for meetings of the Educational Committee but these are hurry-up trips down and back for just the one evening. We have given up our New York office and I do not go there regularly and have not seen any patients there.

In reply to your confidential question about Doctor Clinco I can say that this same question was raised at the Washington meeting by Doctor Tidd and by Doctor Grotjahn and at first I thought we had slipped up because there is a requirement that an applicant must be a member of an affiliate society before he can be taken into the American. However, when we looked up his application I found out that he had been certified by and sponsored by the Rado society, even though he is at present a resident of Los Angeles. Therefore, I assume that he completed all of their requirements and was taken into their society and could now enter the Los Angeles society by transfer provided that you were agreeable. At any rate this satisfied the requirements for the American and this is how he got in. I am sorry that we did not know about the local situation with respect to him before the committee passed on the applicants or we might have made some stipulation of this kind.

Best regards to Maria and yourself.

Cordially,

Robert P. Knight, M. D.
