

MINUTES OF SCIENTIFIC MEETING
October 25th, 1935

1

(961 So Manhattan Plc)

Total attendance 26

Guests: Dr.& Mrs.Benioff Dr.G.Segall
 Dr.Henderson Dr.H.Abraham
 Mrs.Brunswick,sr. Mr& Mrs.Lachenbruch
 Mrs.Edgar Daniels

Dr.Simmel presiding.

Speaker: Prof.Paul Epstein

Subject: "Freud's Metapsychology"

Prof.Epstein presented a complete outline of Freud's papers on Metapsychology.

Discussion: Drs.Brunswick, Abraham, Simmel, Mrs.Leonard.

Summarizing the evening's topic Dr.Simmel indicated that before Freud studied the structure of the dynamics of the ego he was interested in what was conscious and what unconscious. Making the unconscious- the repressed- conscious was then purpose of analysis. The discovery of what is repressing made sequence of mental life possible for description by the dynamic, topic and economic viewpoint. The natural laws of these three aspects Freud calls Metapsychology, - to differentiate between School Psychology.

Adjournment.

Margrit Libbin, Secretary.
